Panel Debate: Best Practices for Mold PRV Air Sampling

Round 1: What to do with AFDs

Position 1:

Keep NAMs running until cleared
(Derrick Denis)

Position 2:

Put NAMs in scrub mode after demolition, AFDs off right before PRV
(John Lapotaire)

Position 3:

Turn AFDs totally off for 24-48 hours before PRV
(Don Weekes)

Round 2:

Interpreting Water Damage Indicator Spores (e.g. *Stachybotrys*)

Position 1:

One spore is grounds for failure
(Michael Pinto)

Position 2:

One spore alone is not grounds for failure
(Don Weekes)
